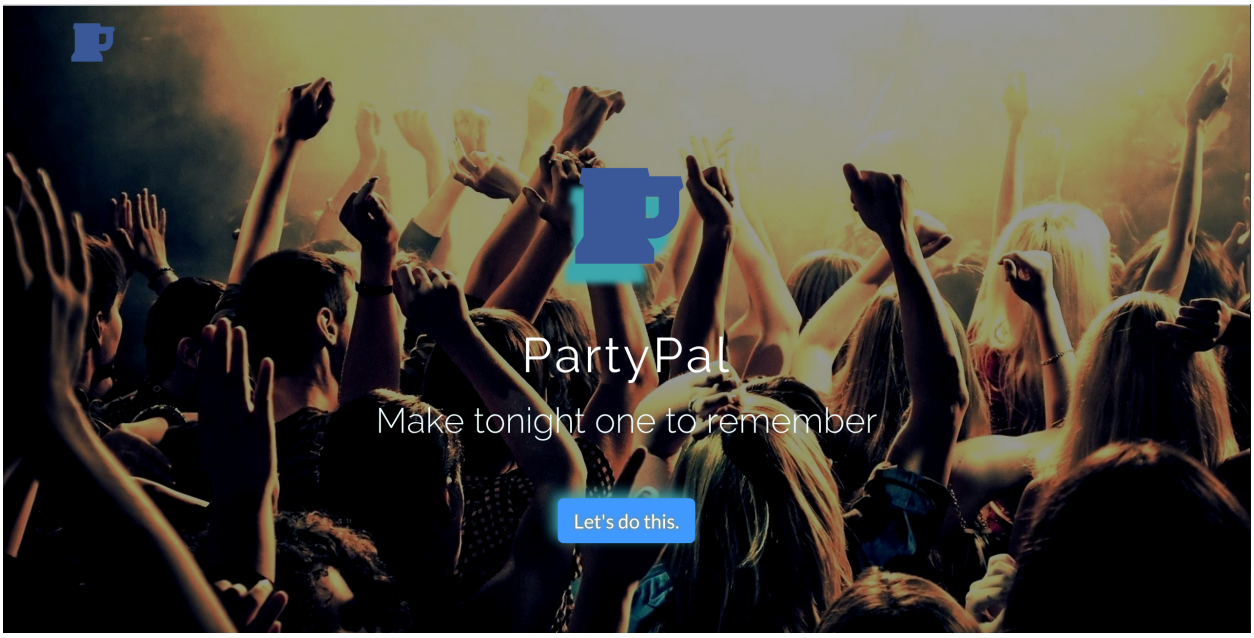
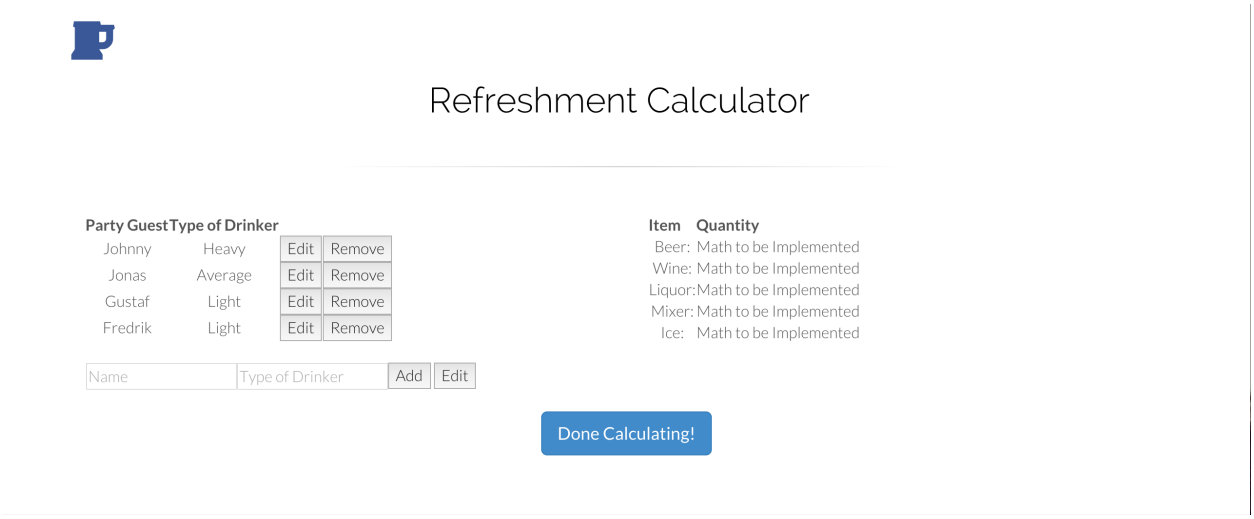
Final0: PartyPal Test Plan

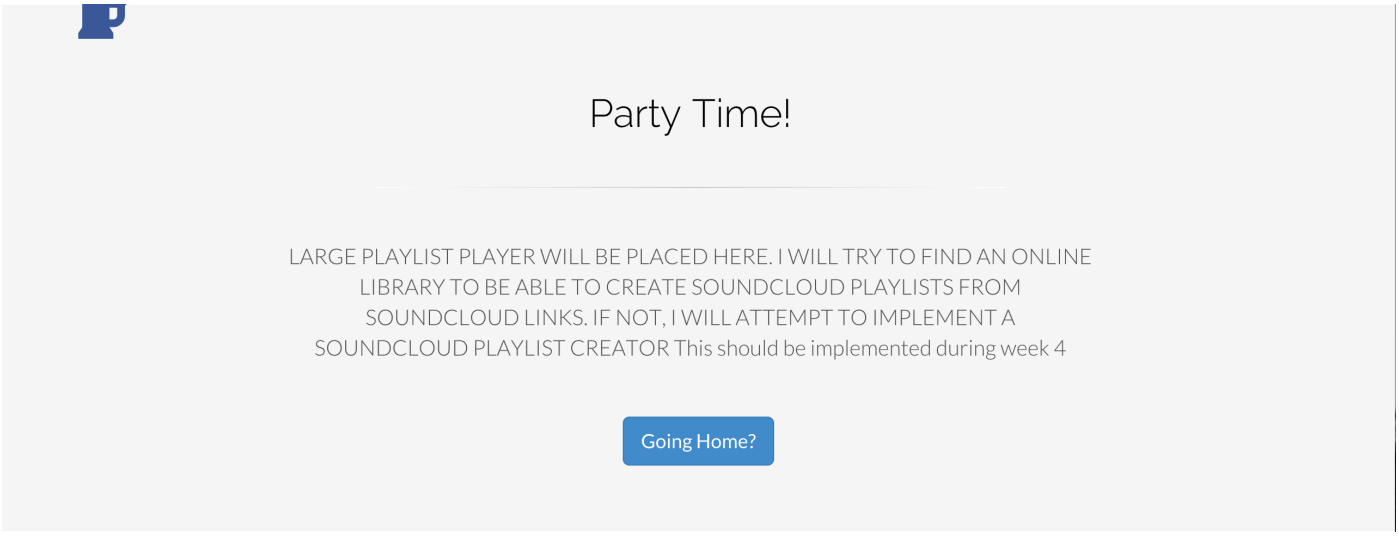
1. Home Page
   - The Home Page should display a “PartyPal” beer icon in the top left hand of the screen that is anchored and acts as a home button which will revert you back to the home page at any time
   - “Let’s do this.” button will redirect you to the next page, which is the Party Planning Page



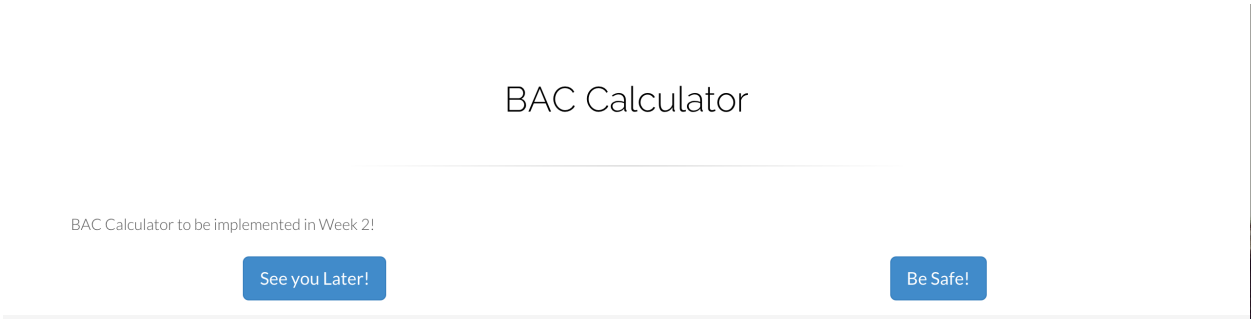
2. Party Planning Page (Refreshment Calculator)
   - The Party planning page has a guest list on the left and the projected output on the right
   - Button functionality has not been implemented yet
   - “Done Calculating” will redirect you to the “Party Page”

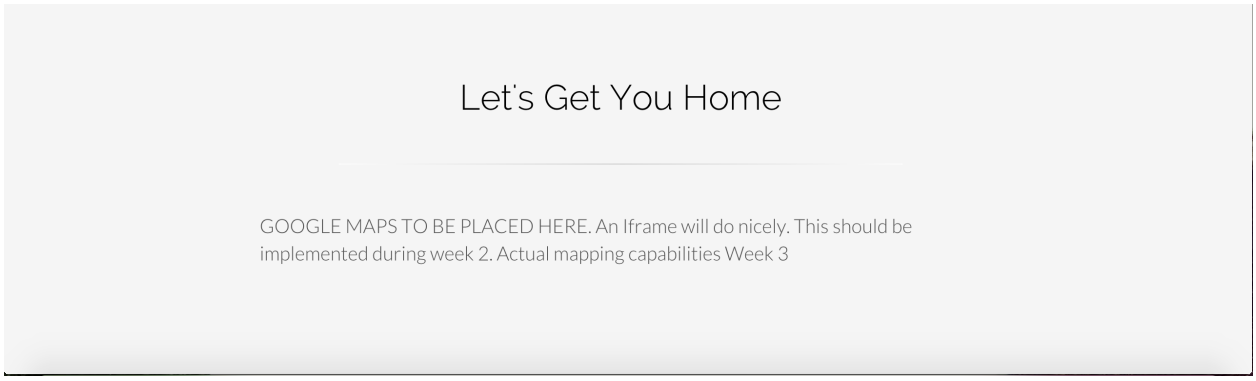


3. Party Page
   - As the picture says, this page will have a playlist executor that can take soundcloud links and turn them into playlists on this page
   - “Going Home?” button will redirect to the BAC Calculator page



4. BAC Calculator
   - This page will calculate the BAC of guests based on gender, weight, drinks, and duration
   - This will be implemented later
   - “Be Safe” button will redirect to the Google Maps page to take the guest home
   - “See you Later!” will be a random animation to be implemented Week 4





5. Google Maps page
   - This page will display the Google Maps API and will allow users to map a path from their party to the guest's home.
